

“Worry about a cyber attack? I’m not worth it.”

Commercial and residential building owners and managers are getting blindsided by the truth.

As technology transforms your industry, more building owners fall victim to cyber-attacks. Cyber thieves want your confidential tenant, vendor and employee data. And more Internet connectivity—for electronic rent payment, cloud computing, even remote-controlled heating and security systems—gives them more opportunities to get it.

With less cyber security than big companies, you’re an easy target for hackers. Recovery after an attack can be very costly, but cyber insurance pays for the specialists and services you need to restore data and systems, meet legal requirements and manage your reputation.

It happened to them – it can happen to you

53%

of U.S. businesses were cyber
attacked in the past year*

Types of attacks

Victims experienced these
common attacks. New threats emerge
daily. Security can't keep up.

53%	Malware / viruses
51%	Ransomware / cyber extortion
35%	Distributed denial of service attack
29%	Social engineering
25%	Cyber extortion

*All statistics from 2019 Zogby
Analytics study sponsored by HSB

Causes of attacks

Hackers exploit mistakes and unsafe
online practices by employees,
contractors and third parties.
Common missteps include:

- Clicking on fraudulent email links
- Providing confidential data to fake
requests from trusted sources
- Failing to update passwords
- Using unsecured mobile devices

What are the risks

Most property policies exclude the
damage caused by cyber-attacks:

- Breach of confidential records
- Fraud, identity theft
- Intellectual property theft
- Damaged/destroyed data, systems
- Revenue lost during downtime
- Damaged reputation, lost trust
- Third party liability

Recovery costs really add up

38%

of victims spent \$50,000 or more
responding to cyber-attacks*

Cyber coverage cuts your losses

Cyber coverage pays to get your
business back to normal, helps you
meet legal requirements and lessens
the blow of income lost to downtime:

- Data recovery and re-creation
- System recovery and repair
- Lost business income
- Reputation management
- Ransom, extortion payments
- Data breach response expenses
- Identity recovery expenses
- Data breach liability and
legal expenses
- Payments to fraudulent party
