

Your trucking customers

Save more with safe driving

What is DriveEasy Pro?

DriveEasy Pro is our safe driving program that uses telematics to monitor driving patterns and behaviors, including the Dashcam program. This transparency offers your Trucking customers insight into their vehicle's performance on the road and rewards consistently good driving behavior with premium savings.

Monitor and reward safe driving

Trucking Dashcam*

This program allows Trucking customers to:

- Protect their business with video recordings
- Receive up to a 10% premium savings by opting in
- Have total privacy, our cameras are only recording the road
- Install dashcam and drive, no app required

How it works

- Install the dashcam on the vehicle listed in the package
- Return the dashcam(s) and equipment if the policy is canceled, requirements aren't met, or the vehicle is removed
- GEICO may use driving data to personalize customer's future rates

*Generally, eligible customers are For Hire Transportation operations and have heavy trucks with a 300+ mile radius. See your state-specific product guide for details.

Give your Trucking customers added protection and savings with GEICO DriveEasy Pro.

This material is intended for general information only. It does not extend or expand coverage beyond the policy contract. Please refer to the policy contract for state specific details.

How do customers set up the dashcam?

GEICO will ship the dashcam equipment to DriveEasy Pro customers, along with installation instructions. The equipment must be installed as outlined in the installation guide. Once installed, the dashcam will connect with our services and begin to monitor for safety events.

- The Dashcam Installation Guide is also available online at [geico.com](https://www.geico.com)
- GEICO uses a single camera model compatible with ports that have an electronic logging device (ELD). Customers can contact us for a free replacement power cord adapter.

How much does the dashcam cost?

There is no additional cost for the dashcam or to participate in the program. If the policy is cancelled or a participating vehicle is removed, customers are required to return the dashcam, free of shipping costs.

What data does the dashcam collect?

The road-facing dashcam monitors for safety-related driving events and records videos of potential incidents. The dashcam does not record any cabin video or audio.

Cost-saving tips and important program details

Enroll to save:

Savings depend on equipment installation and participation from all qualifying vehicles on the policy.

Easy returns:

Returning equipment is required and free if a policy is cancelled, a vehicle is removed, or the customer unenrolls. We'll provide simple instructions. Customers may incur charges for unreturned equipment.

Confirm shipping:

Customers are responsible for any lost equipment, so be sure to confirm the shipping address.

Securing your customer's information

DriveEasy Pro only collects data from vehicles with installed equipment when in use. All data is confidential and used by GEICO to create a personalized rate at renewal. Additional information about DriveEasy Pro is available on GEICO Gateway and in your state-specific Product Guide.

Uninstalled dashcam equipment may be subject to a surcharge, refer to your state-specific product guide for details.
