- Average Retail Primary line size – \$2.5M
- Average Excess of Loss % line written – 10%
- Average Primary % line written – 10%
- Current portfolio is CAT exposed with limits deployed based on 1/100 – 1/200 modelled PML for various CAT perils
- Focus on “softer” General property business segments, such as:
 - Commercial Real Estate
 - Retail
 - Habitational – minimum \$100K deductible
 - Warehouse/Industrial/Light Manufacturing
 - Casinos
 - Communications/Telecom
 - Municipalities and School Districts
 - Manufacturing (no mining, steel, chemicals, energy)
 - Cryptocurrency mining
 - Self-Storage
- Minimum premium: \$100,000
- Minimum Rate on Line: 5% for layer subject to occupancy, attachment, and CAT exposure

Capabilities

- Paper: Lloyd's Syndicate #4444 – Underwritten by Certain Underwriters at Lloyd's (via Canopius Insurance Services Inc.)
 - The D&F USA capacity available is **separate and in addition** to our London Syndicate capacity, we can participate on the same deals at differential pricing/structures – no cross-platform conflict
 - **\$10M** usable and deployable CAT exposed capacity
 - Flexibility around T&Cs, deductibles, no mandatory terms & conditions requirements
 - All UW decisions made by local UWs without referral, with excellent response time
-
- Flexible capacity, can be used in Primary or XOL, dependent on each deal
 - No minimum attachment points
 - Higher Excess of Loss layers will have minimum Rate on Line requirements depending upon CAT exposure and exposed TIV within layers, with minimum Rate on Line between 2.5% to 5% of layer limit
 - Primary writings are focused on low attrition business with adequate deductibles, subject to minimum \$100,000 deductibles
