

Proven solutions to help manage risk and maximize safety in the workplace.

Whether you have multiple locations across the country or one facility, we have the know-how and geographic capability to handle a wide variety of hazards. For decades, we've provided innovative, effective risk management programs for healthcare facilities, reducing losses and improving operations for many of our customers.

You'll have an experienced account executive who'll perform an in-depth review of your exposures to help pinpoint safety issues so you can better prevent accidents. The account executive coordinates with professional local specialists in healthcare, who understand the risks you face, to deliver risk reduction services and support.

Examples of risk reduction resources and initiatives.

Developing a safety culture. By examining the interaction of equipment, material and people, we help you enhance workplace safety by improving the process. To further engage and motivate employees, we can assist you in integrating behavior-based safety principles to create a safer workplace.

Injury prevention for patient handling, transfer and repositioning.

To help reduce this major source of employee injury, we can provide:

- A complete analysis of specific tasks/exposure types and root causes leading to injuries.
- Assessment of mechanical equipment needs.
- Observations of manual methods/techniques to identify ergonomic risk factors.
- Assistance with the development of a "No Lift" program.
- Development of supervision methods and training.

Prevention, the best practice.

Help control safety risks on every floor of your facility, with:

- Safety and risk management programs
- Technical information and training
- Slip-and-fall injury prevention
- Assistance with workplace violence prevention
- 3-D Driving ProgramSM
- Industrial hygiene consultations supported by our in-house AIHA/ISO accredited lab¹ and much more

Slip-and-fall injury prevention. A comprehensive look at all aspects of the exposure, including footwear requirements, walking surface maintenance, co-efficient of friction on walking surfaces, fall logs/trend analysis, lighting, and safeguards for slopes and ramps.

Return to work. Through a focus on ability management and what an employee can do rather than their limitations, we can provide guidance on developing formal programs, forming a return-to-work team, completing task assessments, and assisting in the identification of transitional jobs.

Workplace violence. It could happen in any workplace, but in a healthcare facility, there are added issues of combative residents, mental impairments, family emotional issues, verbal abuse, and lack of planning or procedures for such incidents. We can review your violence-handling procedures; incident management techniques; communication and leadership; and security control measures.

Industrial hygiene consultation from our industrial hygienists and AIHA/ISO-accredited lab¹ can help identify, assess and control exposures to workplace substances. These can include cleaning and sterilizing chemicals, waste anesthesia gasses, solvents, air quality complaints, or other concerns.

Transportation solutions such as The Hartford's 3-D Driving ProgramSM which combines current defensive-driving principles with a unique in-vehicle approach. Assistance with fleet management, including multi-passenger vehicle safety, wheelchair tie-down procedures, driver selection/qualification, safe parking directives, passenger loading, and rider security. We also offer monthly electronic safety bulletins about fleet management and driver safety.

Evaluating other exposures. Support is also available for business continuity management, visitor/contract control, safety committees, home healthcare controls, and assessment of dietary, housekeeping, laundry, and maintenance exposures.

Valued Assets. Besides superior risk engineering services, we deliver extra value to our healthcare accounts through:

A seasoned team with 17+ years of experience on average,² relentlessly focused on customer satisfaction.

Consistency in our approach to all aspects of business. It adds up to high service ratings in claims, recognition as one of the World's Most Ethical Companies and a demonstrated track record of customer retention. In fact, some have been with us for 60+ years.³

Flexibility. We offer more collateral options, comprehensive coverage options, bundled/unbundled program availability and an innovative RMIS platform that helps you effectively manage risk.
