

Where Coverage Meets Strategic Risk Management

For over 100 years, EMPLOYERS® has been America's Workers' Comp Specialist®. Our Excess Workers' Compensation product combines that legacy with next-generation technology and services that help you navigate from managing claims to actively controlling risk.

Interactive Claims Dashboard

See your risk with exceptional clarity. Track open claims, analyze trends by location, department, or injury type, and drill down from high-level KPIs to individual claim details through a dynamic, fully customizable dashboard accessible from any device.

Industry Benchmarking

Know where you stand and where you can go. EMPLOYERS benchmarking intelligence compares your performance against matched peer organizations to identify gaps, understand loss trends, and quantify the potential savings associated with closing those gaps.

Total Cost of Risk Optimization

EMPLOYERS analyzes retentions, attachment points, premium structures, and projected claim costs to engineer a program aligned with your financial objectives. Stress-test multiple scenarios to turn insurance from a necessary expense into a competitive advantage.

On-Demand Risk Advisory

EMPLOYERS puts industry-specialized safety resources at your fingertips, available exactly when you need them. Experienced risk advisors deliver practical guidance customized to your industry and operations within moments, not weeks. Our on-demand resources help you navigate inspection readiness, strengthen your return-to-work protocols, and empower your team to build robust safety programs.

Predictive & Prescriptive Modeling

Anticipate risk patterns instead of reacting to them. EMPLOYERS predictive models leverage advanced machine learning to help identify emerging risk patterns before they become costly claims. Our prescriptive analytics engine delivers prioritized recommendations tailored to each claim, supporting your efforts to manage severity once a claim has occurred.

We built EMPLOYERS Excess Workers' Compensation around one idea:

Self-insured organizations deserve a carrier that brings as much to the table as they do.
